VOL. 10 NO. 40 | Lancaster Farming, Saturday, September 4, 1965 | $2 Per Year

John Eby, Jr.

Two Countians Nominated For FFA American Farmer Degree

The degree of American Farmer represents the highest grade of membership achievement in the Future Farmers of America organization It is designed to recognize outstanding leadership ability in farm youth, and to encourage and develop that leadership potential beyond the confines of county and state lines into one of truly national scope

Since states may contribute only one-tenth of one percent of their FFA membership enrollment to the national level, the boys so honored represent the very best that any state can offer

Of such caliber are this year's nominees, John Eby, Jr., Gordonville R1, and Melvin Breneman, Strasburg R1. They will receive the degree at the FFA National Convention at Kansas City in October.

JOHN EBY, JR.

John is the 21-year-old son of Mr and Mrs John Eby, and is a 1962 graduate of Pequea Valley High School Since graduation, he has entered into a CO-40 partnership with his father and they jointly operate the 52 acre di-

Agr. Teachers Meet To Plan Fair Activities

At their regular monthly meeting at Manheim Central High School, Lancaster County's teachers of vocational agriculture this week discussed the various community fair FFA activities in which their students would be involved.

As chairman of the junior dairy show at the Ephrata Fair, Lewis Ayers stated the 4-H and FFA junior dairy show would be held on September 24, at 7 p m. with assistant Dauphin County agricultural agent John Harris serving as judge. The 4-H and FFA baby beef show will be held on September 23, also at 7 p m. The tractor driving contest will be held on the afternoon of September 25 in the high school parking lot.

Jess Erway, Manheim teacher, told the group that the Manheim Fair will feature window displays as part of its school participation program, and that $250 had been appropriated for agriculture and home economics participation.

It was announced that Sep-

Nearly Two-Thirds Of Pennsylvania Cows Are Bred Artificially

More than 40 percent of all U.S dairy cows were bred artificially last year, the current report of the Dairy Herd Improvement Section of the U.S. Department of Agriculture shows.

Pennsylvania headed rankings of individual states with 64.1 percent of the State's dairy cows artificially bred. Wisconsin the nation's leading dairy State was fourth with 58.5 percent Wisconsin,

Farm Calendar

At press time the only activities appearing on next weeks Horizon are Labor Day and Back-to-School Day In light of the activities scheduled for the following week, perhaps that is just as well!

ASC Committeemen Elected For Sixteen County Communities

Eighty committeemen were elected this week ot represent their respective communities and serve in the local administration of programs under the county Agricultural Stabilization and Conservation office

The chairman, vice-chairman, and regular member of each committee will be delegates to the ASC county election convention on September 13, at 8 p m, at which time the county board will be selected.

By areas, the following county farmers were selected to represent their communities (for each area they are listed in the following order — chairman, vice-chairman, regular member, 1st alternate, and 2nd. alternate.)

Community No. 1 — Conoy, West Donegal & Mt. Joy Town-

Milk Hearing Rescheduled For October 4th

According to the USDA, this week, the public hearing on amending the Delaware Valley federal milk marketing order will be rescheduled for October 4, at 10 a.m., in the Sylvania Hotel, Philadelphia.

This order sets minimum prices to be paid dairy farmers supplying milk to the Philadelphia. Pa., and Wilmington, Del., metropolitan areas, and to most of southern New Jersey.

USDA's Consumer and Marketing Service had announced earlier that any decision to terminate the order would be deferred because of the general agreement at a public

Controversial Farm Leader At NEPPCO Show

A farm industry leader who has stirred up a hornet's nest of controversy from here to the nation's capitol in recent weeks will highlight a series of information-packed talks slated for the annual gathering of poultry producers from 14 states in Harrisburg in October

Frank J Lipman, president of the integrated broiler operations known as Lipman Brothers, in Augusta, Maine, will take part in the annual ex-

(Continued on Page 5)

Mark Campbell, New Ag. Teacher At Manheim H.S.

It was learned this week that Mark Campbell has been named to succeed Herbert Hoffritz as teacher of vocational agriculture at the Manheim Central High School

Campbell is a native of Herndon, Pa, in Northumberland County He was raised on a dairy and poultry farm there

He is 23 years old, single, and graduated this past June from Penn State University where he majored in agricultural education

Campbell will assist Jess Erway in the vo-ag department at the high school.

Lancaster County VO-Ag Boys Take 12 Blue Ribbons And 3 Titles At FFA Show

Twelve blue ribbons fell to eleven Lancaster County Future Farmers at the FFA Southeastern District Dairy Show at Hershey this week, with Daryl L. Bollinger the only double-blue winner Breed titles in Jersey and Brown Swiss breeds, a junior championship in the Holstein breed, and a second place win in the County Group class speak well for the local boys' efforts All blue ribbon winners will be eligible to participate in the Junior Dairy Show to be held at the Farm Show Bldg, on September 13

Daryl L. Bollinger, Cloister Chapter, repeated his last week's 4-H district show performance in capturing the junior championship in the Holstein breed with his senior yearling Star Segis Osborndale; Bollinger also received a blue ribbon for fourth position in the intermediate calf class.

A Solanco Chapter lad, Jay Marvin Herr, had the junior champion with his senior yearling and went on to take the grand championship for the Jersey breed

Dale Forwood of the Manheim Chapter had the junior and grand champion Brown Swiss in his Weeping Willow Magic Pansy, a senior calf.

With Daryl Bollinger supplying two of the animals, and Clifford Bollinger and Linford L Weaver one each,

DHIA Directors Evaluate Effects Of Rate Raise

In their quarterly meeting held at Agway, Inc, the directors of the Red Rose Dairy Herd Improvement Association were told by head tester Wilbur Houser that no herds had been lost because of the recent rate hike of 5 cents per cow.

That increase reflected a raise in pay to the testers that was voted at the last directors' meeting, and which became effective July 1, 1965 This had been the first such raise the supervisors had been granted in the past five years, and it raised the testing fee from 25 cents to 30 cents per cow for herds under the DHIA program

The subject of insurance for association equipment was reported on by the committee

Watershed Projects On The Way In Northeast

Eighty-seven towns having a population of 518,000 will obtain municipal water supply from 88 multiple purpose reservoirs completed or planned in 70 watershed projects, according to the U. S. Department of Agriculture.

Twenty-five of the towns and cities are in the Northeast much of which is affected by drought and water shortages. Twenty-two of the reservoirs will provide water supply for 173,000 people in Maine, Massachusetts, New Hampshire, Pennsylvania, Virginia and West Virginia.

The watershed projects are authorized by Public Law 566, the Watershed Protection and Flood Prevention Act of 1954. They are initiated and carried out by local organizations, with technical and financial help from USDA.

They combine conservation

Weekly Poultry Report

Eastern Pennsylvania And New Jersey

WEEKLY SUMMARY

LIVE HENS

Prices on light type hens unchanged to ½c higher. Offerings barely adequate & in instances consisted of flocks being moved to make space for young pullets. Demand fair. Few lots heavy type hens moved on undetermined price basis with settlement prices based on ready to cook valuations. Offerings light for a limited demand.

TURKEYS

Dull increased offerings heavy type hens & toms anticipated within next several weeks. Too few negotiations to report prices.

Fogelsville

August 31, 1965

(Prices for dock weights, cents per lb except where noted)

Hens, light type, range 7-9½, mostly 7½-8½, Hens, heavy type 8-17, 11-15; Pullets 12½-30½, 23-28½, Roasters 10-28½, 19½-25; Turkeys, toms 15-20; Turkeys, hens 22-33½; Rabbits 20-35, 26-32; Pigeons (per pair) 52½-90, 67½-75; Jumbo Squab 70.

Total coops sold: 833.

Eastern Shore Exchange

WEEKLY SUMMARY

Broilers and fryers live prices on the Eastern Shore Exchange averaged 16.49 cents per lb. this week, down .05-cent from the preceding week's average.

Prices paid ranged from a high of 17.3 cents on Monday and Tuesday to a low of 15.9 cents on Wednesday.

Sales for the week totaled 1,413,400 head, nearly 200,000 head more than last week.

Delmarva

Sept. 3, 1965

Delmarva live broiler and fryer prices remained comparatively steady with a fair demand for light auction offerings. Live supplies were adequate with sizes improved and generally within desired ranges.

Ready-to-cook demand ranged fair to good though lacked aggressiveness. Prices continued very competitive.

Estimated slaughter for Friday and Saturday, 898,000 head, compared to 949,000 head last weekend.

In the 24 hours preceding market close on Friday, broilers and fryers live prices ranged from 16 0-16 8 cents per lb. on sales of 1,040,600 head.

From Where We Stand . . .

(We are pleased to feature these words of Dr. Floyd Hicks, Poultry Specialist, Penn State University as a guest editorial this week.)

What A Poultry Association Does

Penrsylvania is a leading poultry state. Poultry is economically the second largest agricultural industry in Pennsylvania. There are still several thousand poultry farms within this state. In fact, at the last count there were more commercial poultry farms than commercial dairy farms. Thus we find members of county poultry associations asking this question: "Should we continue this association when we only have a few members?" The answer is usually "yes" for the following reasons:

1. A poultry association, in cooperation with the local Extension office, provides an opportunity for its members to participate in a unique educational effort that only poultrymen can give to poultrymen. Sharing practical experience with each other is the greatest value here in stabilizing a local industry for the mutual benefit of all.

2. A poultry association gives the county or area a united voice in state, national and international poultry matters. We are still going to be dictated to from the top more and more, so we ought to have some control over this phenomenon.

3. A poultry associattion makes it easy to disseminate information where everyone can hear at once about new developments, ideas and programs. Then, you can give an on-the-spot evaluation. (What you **want** instead of what others **think** you ought to have all the time.)

4. Federal grain programs, freight rate changes and federal control legislation can be discussed and evaluated by each area for that area if an association is active.

A poultry association provides the framework for recreation, sociability *and entertainment for poultrymen with common interests.*

6. Poultry associations can put on a united effort to educate the public on the actual facts of the association, the industry, the egg, market improvement, "sympathetic" understanding, and promotion.

7. Counties that have strong associations usually have a strong poultry industry. Contrary to popular belief that associations are a place to lose customers, most people who belong to an active association will tell you they receive more than they give.

8. As the number of farms decrease in the future, a united front will be increasingly more important for all farm organizations if they are to obtain fair representation in Washington and Harrisburg

9 Local poultry associations are more apt to be invited to give press, radio and television interviews on the activities of the industry than are individuals

10 For years a few devoted people have kept the few dozen poultry associations alive. These far-minded people should be commended because as poultry enterprises get larger and fewer and the industry gets more complex, associations will be even more useful and vital to survival.

Item number ten is the most important item of all. It takes devoted, interested poultrymen to make an association thrive.

(Ed. note: What are YOU doing to help further your local association?)

★ ★ ★ ★

The Right To Choose

Politics is one of the principal occupations in a free nation. But a nation will remain free only so long as the voters control the politicians.

The people of the United States have no conception of what fear of government officials means. They have never been herded into oblivion by state police for expressing views in opposition to dictators in power.

As a result, U.S. citizens have never lived in fear of officialism. Under our Constitution, they have enjoyed the right to choose . . . the greatest civil right.

But politics has been whittling away at that right and steadily restricting the individual's right of choice in the U S.

Therefore, it is well to read the words of one who remembers living in fear . . . where the individual was the plaything of officialism . . . where he had no choice.

The following letter "To The Editor" appeared in a Portland, Ore., newspaper recently. It said in part:

"Although my age was only eight when my father was forced to leave Russia because of persecution, my memories are very vivid of the tribulations endured under government controls. Because of these unforgettable experiences, the constitutional rights and liberties are treasures worthy of *preservation regardless of cost.*"

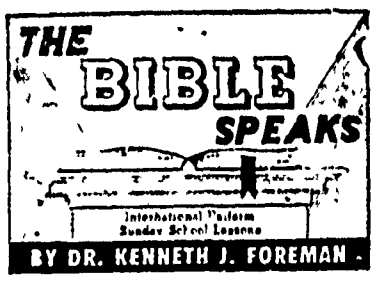
When you see a candidate for public office, or an elected official advocating policies that undermine constitutional safeguards, states rights and individual opportunity, turn thumbs down on him while you have a vote and a choice.

★ ★ ★ ★

Not Anymore He Isn't!

(The following story comes from Daniel P. Ehlers, D.V.M. of the Pennsylvania Dept. of Agriculture, via the Merck Serviceman's Memo.)

"A rather jazzy looking bird was brought to the lab for examination several years ago The owner followed me to the necropsy room and watched while I took the bird out of the box, grapsed his wings with my right hand, and in the approved manner gave his neck a good strong outward and upward pull. The owner wanted to know how long he would sleep When I assured him his 'sleep' was permanent, he levitated, and said, 'Oh, my Gosh! I just wanted you to look at him He's worth $200.'"



Growing in Faith

Lesson for Sept. 5, 1965

Background Scripture: Luke 17 5, 6; Philippians 3 12-16, Colossians 1 9 14, 2 1 7 3

Devotional Reading: Ephesians 4 11-16.

THE WORD FAITH has various meanings, and each of them is important. It is used in the New Testament often, but it does not always mean the same thing. The foundation meaning is confidence. Having faith in Christ means having confidence in him. Faith in God is likewise confidence. A man really has faith in God when he relies on his word and his promises and his power and mercy.

Dr. Foreman

Faith also (in the book of Hebrews especially) means confidence that what God commands me to do, I can do. Faith in the great 11th chapter of Hebrews is a going, doing, obeying faith. In the letter of James, faith is contrasted with action. But James discounts faith while the writer of Hebrews admires it. This shows that they were talking about different things. The faith low-rated by James is belief about God, not belief in God. Faith about God may make no difference in life; faith in God is a Christian's life-foundation.

Faith does not stand alone

In reading the New Testament, especially the Gospels and the letters of Paul, if the reader will understand that Paul and Jesus usually mean confidence in God when they say "faith", the reader cannot go far wrong Now Paul is known as the apostle of faith, but Paul would be the last person to suppose that faith is all a person needs to have to be a full-fledged Christian. Paul wrote to the Corinthians a letter with the famous chapter on love; and he winds up that great prose-poem on love by naming faith and hope along with it as the three abiding things of life. But he makes it clear that faith by itself, even if you could move a mountain with it, leaves you no better than you were. He says in so many words that love is greater than faith and hope. So when we think of the place of faith in a Christian life, we must think of faith-with-love, faith-with-hope, and not faith-alone. Probably Paul would say, if asked, that faith without hope and love is just as dead as James says it is.

Blackboard or Garden?

Stranger though he was to the city and church of Colossae, Paul was glad when he heard about the Colossians. The thing he mentions first of all was their faith. (Noticing readers of the Colossians letter will see how he brings love and hope into the picture too!) But there are two kinds of faith. One is like an item on a blackboard. The teacher can write up there a list of sentences with the title "Christian Beliefs." Then the teacher can take pointer in hand and point to each item in turn and get the class to say of each one, "I believe that." That is a kind of faith, but it is not what interested Paul. You note that he soon was speaking of "bearing fruit." That is the kind of faith you hear most about. It is faith with a harvest, faith that walks serenely into the face of danger, faith like a laden fruit tree. Real faith is not an item on a blackboard; it is a garden seed, an orchard tree, pleasing the eye and sustaining life. You may be sure: No fruit, no faith!

Growing in Faith

Paul says one thing here which might be misunderstood. He holds out a beautiful picture of what Christ has done and does for us, — **"provided that you continue in the faith."** You might think he means staying put, standing firm, not going nor growing. But if you study what he has just been saying about the Christian life, you can see he means something quite vital and vigorous: "Be filled with the knowledge of his will . . . bearing fruit in every good work — increasing in the knowledge of God . . . strengthened with all powers . . ." The Christian life is the garden in which these things come to pass.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

ATTEND THE CHURCH OF YOUR CHOICE ON SUNDAY

Now Is The Time . . .

To Be Alert for Silo Gas

MAX SMITH

Silo filling time is at hand and many acres of corn will be made into silage. Even though most parts of the county have had decent rainfall during the past month, farmers should always be cautious about the presence of this gas. The greater use of nitrogen fertilizer to grow our corn crops increases the danger of the nitrogen dioxide gas The first week after filling the silo is considered to be the most dangerous time; the gas is heavier than air and has an odor resembling various laundry bleaches Never enter a partly filled silo unless the blower is operated for at least 10 minutes

To Handle Shipped Cattle Carefully

Many barnyards and feedlots will be filled with feeder cattle in the coming weeks. Plenty of fresh air, ample rest and quietness, and bulky feeds for the first week is strongly recommended Shipped cattle should not be mixed with acclimated cattle, or come into contact with them at the feed trough or water trough The danger of shipping fever should be recognized for the first two to three weeks after arrival on the farm Prevention practices are much better and cheaper than attempted treatment and cure.

To Remove Those Bluegills

Many farm pond owners face the problem of too great a fish population in their pond In most instances the bluegills reproduce so rapidly that the owner does not remove them fast enough Most fishermen like to fish for the bass because they are larger; as a result the bluegill population increases to a point where there is not enough food for any of the fish Pond owners should encourage the fishing and removal of the maximum number of bluegills each year. Where severe stunting and over-population exists, it is advised to drain the pond and start over again

To Make Corn Silage Without Additives

We are aware of some activity in using additives to make better corn silage. In the first place this should not be necessary when we allow the corn to develop to the

(Continued on Page 5)

● DHIA

(Continued from Page 1)

which was established at the last meeting to study that question The committee, composed of Victor Plastow Samuel Dum and Jacob Houser, presented cost figures for insuring the association's approximately $4 000 worth of testing equipment It reported that all of the equipment would have to be covered by insurance not just the milk meters which were the association's main concern, and that this would amount to about $80 per year This was considered too costly a means for protecting the $2,100 worth of milk meters (12 units valued at about $175 each). The committee is now evaluating the possibility of insuring the building in which the equipment is stored and its contents as a possibility In the meantime, the subject was tabled

Robert Hess, state DHIA director, reported a program loss of 76 herds in the state for the nine-month period beginning October 1, 1964 This was opposed to a 67-herd increase during the corresponding period a year earlier, and was the first such loss in number of herds tested in many years Most of this loss was considered to be from the farmer victims of the cost-price squeeze that has persisted in recent years who had dispersed their herds, and not from any dissatisfaction with the testing program itself.

In other business, President Samuel Dum appointed the following committee chairmen. tester award, John Kreider, annual banquet location and dinner, Curtis Akers, annual banquet program, Robert A Breneman, and Samuel Kreider, auditing.

● NEPPCO

(Continued from Page 1)

position and convention of the Northeastern Poultry Producers Council (NEPPCO) at the Farm Show Building on October 12-13-14.

He will share the rostrum with a score of other well-known poultry industry experts scheduled to bring producers from the Northeast up to date on topics ranging from disease control to on-farm egg processing. Some 5,000 producers are expected to gather for the big annual get-together

Lipman's pending application to the federal Area Redevelopment Authority (ARA) for a $2.5 million loan to help finance a huge $5 million broiler operation in New Castle, Pa., ran into a storm of protest from broiler growers in all parts of the country who argued that the government should not help finance growth in an industry which already is suffering from overproduction.

Lipman's topic, "Opportunities for Broilers in Pennsylvania" is expected to be the most anticipated talk at the exposition, and in the tradition of past shows is expected to draw comment and questions from the audience He is slated to lead off the second day's session on Wednesday, October 13 at 11 a.m.

● Milk Hearings

(Continued from Page 1)

meeting in Philadelphia June 8 that the order is necessary for the area. Meanwhile, proposals to amend the pooling and other provisions of the order were invited from everyone interested, for consideration at a public hearing. Also, C&MS requested that more specific details be submitted on proposed order provisions with reference to proposals already received

A major issue at the hearing will be the proposed adoption of marketwide pooling, through which all dairy farmers serving the Delaware Valley market would be paid for their milk at a uniform price per hundredweight Under present order provisions, prices to dairy farmers who do not sell to the same handler can vary, according to the use made of the milk by the different handlers

Another proposal would provide marketwide pooling, with provisions similar to those of the New York-New Jersey order

Other proposals to be considered at the hearing are aimed at improving the present order provisions which provide for individual-handler pooling In one way or another, they are aimed at strengthening the present order to overcome practices which in the past have resulted in undercutting established minimum order prices.

For instance, one proposal, if adopted, would deny cooperative associations that sell milk at less than order prices the privilege of computing and paying their members a "reblended" price based on all sales of milk by the cooperative to different handlers, both in and out of the marketing area.

In announcing the Oct. 4 hearing, C&MS officials said testimony still pending from an earlier hearing held Jan 18-19, will be considered in conjunction with the new evidence to be received at the Oct 4 hearing.

C&MS officials said that other proposals to consolidate the Delaware Valley order with the Upper Chesapeake Bay, or the New York-New Jersey Federal order will NOT be considered at the Oct. 4 hearing, in order not to burden the hearing record with a detailed review of the entire provisions of three orders.

If the evidence received at this hearing does not provide the basis for amending the Delaware Valley order so as to effectuate the declared policies of the Act, a hearing will then be convened on these additional proposals to consider whether the Delaware Valley order should be merged either with the New York-New Jersey order or the Upper Chesapeake Bay order

If, after considering evidence presented at the hearings, USDA recommends amending the order, farmers, milk dealers, and others would then be given opportunity to file exceptions, which would be considered by USDA before issuance of a final decision. Any amendments proposed in the final decision will be submitted to dairy farmers serving the Delaware Valley market, for approval

● Now Is The Time

(Continued from Page 4)

full dent stage The use of 20 pounds of ground limestone per ton has given some increased gains when fed to beef cattle but no advantage for dairy cattle The use of urea with corn silage in the silo is not recommended because of the danger of toxicity, low palatibility, and fermentation losses

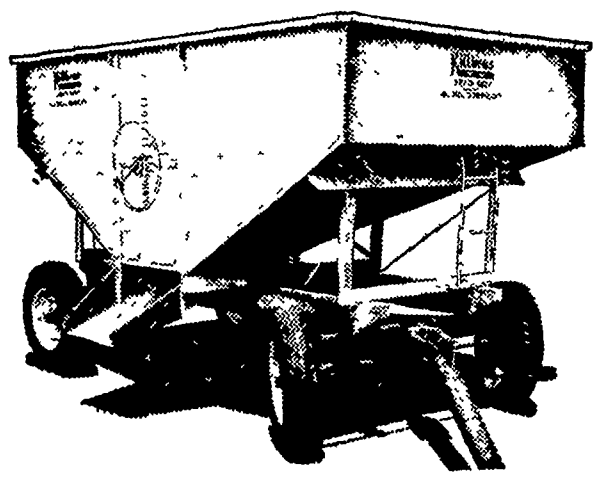
KILL BROS. "The Original"
All-Welded
GRAVITY GRAIN BOX
Bigger 165 bu. - Priced Right - Under $200.



The Leader in Sales of All-Welded Gravity Grain Boxes Since 1955

WHY YOU GET MORE WITH A KILL BROS.

- Ladder on front and rear of body.
- New extra steep slope for faster flow.
- All welded 14 ga. domestic steel body.
- Heavy angle iron undercarriage.
- Stake pockets welded on inside.
- Capacity approx. 165 bushels.
- With factory fitted sides over 200 bu.
- Ideal for handling bulk fertilizers.
- Safety door with automatic brake which holds door at desired opening.
- Truss rod and "X" brace supports rear of hopper.
- Wrap-around welded reinforcement at top corners.
- Completely assembled, ready to mount on standard wagon gear.
- Depth 21" to 54".
- Weight 950 lbs.

This box can be equipped with unloading auger for fertilizer, grain, etc. Order early for Fall.
Sample box can be seen at Lititz and Strasburg Pike store.

these three Cloister youths placed second for county group with their Holstein entries.

The county boys were unable to score in the Ayrshire and Guernsey breeds with the exception of Dale Herr's first place blue ribbon in the Ayrshire intermediate calf class. This was the calf Dale received last year from the Ayrshire breed association of Lancaster County.

Judges in this 10th annual event were Jonas Gruber, East Berlin, Holstein fitting and showmanship; Howard Weiss, Myerstown, colored breeds fitting and showmanship, Merle Miller, Carlisle, type colored breeds; Ray Seidel, Virginsville, type-Holsteins

rector of Pennsylvania Farm Bureau Cooperative Association in 1958 and continued on the Agway board following the merger of Agway and PFBCA earlier this year.

Esbenshade operates a 112-acre farm with laying hens and beef cattle, and grows tobacco, corn, wheat and barley.

He was elected secretary-treasurer of PFBCA this year. He had served as a director of Lancaster County Farm Bureau since 1955 and had been its board chairman since 1958.

Esbenshade was president of Farm Bureau Marketing Cooperative from 1962 to 1965.

He is a member of the Extension Association, having served both as president and vice president Since 1962 he has been president of the Farm and Home Foundation.

● Watershed

(Continued from Page 7)

land treatment, flood prevention dams, channel improvement and other structural measures primarily for flood prevention and agricultural water management, but local sponsors may include municipal and industrial water supply by paying additional cost. Additional cost of the extra storage in the 88 reservoirs is estimated to be $23,500,000.

As of Aug. 1, USDA had received 2,335 applications from local sponsors for assistance on watershed projects in 49 States and Puerto Rico The Soil Conservation Service had been authorized to give planning assistance on 1,125 projects Of this number plans had been completed and assistance in the installation of improvements had been approved for 642.

Hoffman SEEDS

FOR THE QUALITY THAT MEANS

Bigger Yields

PENNRAD Certified Barley is a new variety developed at Penn State It carries all the good yielding and winter hardiness characteristics of Hudson but without the troublesome beards Has good resistance to the disease which commonly attack barley. Stiff straw. Supply of seed limited

WONG Certified Barley Heavy yielding, beardless, Hoffman foundation stocks are hot water treated for smut control

REDCOAT Certified Wheat A consistently high producer in tests at Penn State University, with highest yield of four recommended varieties in 6 of the 8 years tested. Strong straw Noted for winter hardiness, resistance to mildew, rust and Hessian Fly

Other high-yielding Hoffman wheat varieties are **PENNOLL** and **DUAL.**

NORLINE Certified Winter Oats are more hardy than older varieties of winter oats. A good yielder with good bushel weight A strong favorite

Guernsey & Jersey Showmen Lead Countians In 4-H District Show

by Everett Newswanger, Staff Reporter

HERSHEY — The boys and girls from the 14 Southeastern Pennsylvania Counties paraded 290 dairy projects of all breeds before official judges here last Friday at the 20th annual Southeast District 4-H Dairy Show held at the Hershey Stadium.

GUERNSEY

The 4-H"ers with the "Golden Guernsey" projects brought top honors back to Lancaster County by putting together four entries to win the county group class over eight other counties. The winning group included J. Nelson Landis, 1804 Hempstead Road, Lancaster, with his veteran show heifer Har-Len Heroic Rosanna (first senior yearling, junior champion and reserve grand champion); Sue Mumma, Manheim, showing Har-Len V. F.'s Molly (first junior yearling and reserve junior champion); James R. Adams, Landisville, with Har-Len Royal Astor (second junior yearling) and Cynthia Jean Balmer, Lititz, showing Nepturn's Terry of Tulip (third intermediate calf).

Other county placings were E. Eugene Denlinger, Gordonville (fourth senior calf); Marlin M. Stoltzfus, Ronks, (sixth two-year-old) and Nancy J. Stoltzfus, Ronks, (third three-year-old).

JERSEY

Judge for Holsteins and Jerseys, Allie Messer, Pond View Farm, Maryland, picked Thomas Aaron's, Quarryville R1, Lynmoore's Fashion Prince Mannie (second three-year-old) as his reserve senior and reserve grand champion in the Jersey breed. Shirley Aaron, Quarryville R1, had the fourth place intermediate calf, Stephen Arrowsmith, Peach Bottom R1, was fourth in the senior calf class and Wayne Lefever, Quarryville R1 showed the seventh place junior yearling.

Stephen Arrowsmith and Nancy Kreider, Drumore R1, stood first and second respectively in the senior yearling class.

The county group was second

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

SUMMER'S LAST FLING

SPENCE

Tempt late summer appetites with dinner on the patio. Start the menu with shimmering, spiced cranberry gelatin studded with pineapple. Spoon it into a hollowed pineapple shell, garnish with flaked coconut and serve with crisp crackers. What a cool come-on!

Then serve some "different" hamburgers. Hamburgers are to barbecues as barbecues are to summer living — a favorite part. Though long unquestioned in popularity, charcoal grilled hamburgers promise a new flavor delight when prepared with 100% bran flakes.

Or you might like to feature "Par" Cheesy Franks — plump frankfurters lavishly filled with a luscious Cheese cracker stuffing, then wrapped in bacon and grilled over charcoal.

For dessert — Fruit Fluff Cookie Tarts featuring juicy strawberries and plump blueberries.

CRANBERRY DELIGHT

1 quart cranberry juice
1 stick cinnamon
3 whole cloves
2 tablespoons sugar
¼ teaspoon ground cardamon
¼ teaspoon salt
1 (1-pound, 4-ounce) can pineapple tidbits (about 1½ cups)
2 envelopes unflavored gelatine
Flaked coconut

Combine 2 cups cranberry juice with the next five ingredients; bring to a boil. Reduce heat; simmer 10 minutes. Meanwhile, drain pineapple, reserving ½ cup juice. Refrigerate pineapple. Soften gelatine in reserved pineapple juice. Remove spiced cranberry juice from heat; strain and add softened gelatine. Stir until gelatine is completely dissolved. Add remaining cranberry juice and refrigerate until mixture is the consistency of unbeaten egg whites (about 2 hours). Add cold pineapple and refrigerate 1½ hours before serving Garnish with flaked coconut and serve with crisp crackers. Makes 6 to 8 servings.

GRAND BRAN BURGERS

1 pound ground veal
1 pound ground beef
3 tablespoons bacon fat or water
2 eggs, slightly beaten
¼ cup milk
1 cup 100% bran
½ cup finely chopped onion
¼ cup chopped parsley
1½ teaspoons salt
1 teaspoon chopped caraway seeds
½ teaspoon ground black pepper

Thoroughly blend veal, beef and bacon fat or water. Combine remaining ingredients. Add to meats and mix gently to blend. Shape into 10 patties. Grill to desired doneness over hot coals. Makes 10 servings.

* * * *

"PAR" CHEESY FRANKS

1 cup crushed cheese-flavored cracker crumbs
2 tablespoons prepared mustard
2 tablespoons finely chopped parsley
1 teaspoon crushed oregano
½ teaspoon onion powder
8 to 10 frankfurters
16 to 20 bacon slices (about ¾ pound)
8 to 10 frankfurter rolls

Combine first five ingredients. Split frankfurters lengthwise and stuff with cracker mixture. Wrap 2 strips of bacon around each stuffed frankfurter and secure with toothpicks. Grill over hot coals, turning occasionally, until bacon is crisp. Remove toothpicks and serve in warm rolls. Makes 8 to 10 servings

FRUIT FLUFF COOKIE TARTS

1 10-ounce package shortbread cookies (about 40) finely rolled
1 teaspoon ground allspice
1 teaspoon ground cinnamon
1 teaspoon ground nutmeg
¼ cup butter or margarine, melted
1 envelope unflavored gelatine
¼ cup lemon juice
3 eggs, separated
¾ cup water
½ cup sugar
1 teaspoon grated lemon rind
¼ teaspoon salt
1 cup heavy cream, whipped
1 cup sliced strawberries
1 cup blueberries

Blend shortbread crumbs with next four ingredients. Divide crumb mixture into 12 standard size paper-lined cupcake cups. Press firmly against sides and bottom with a spoon. Place in freezer while preparing filling. Soften gelatine in lemon juice. Cook egg yolks, water and ½ cup sugar until mixture just comes to a boil, stirring constantly. Remove from heat. Stir in softened gelatine and lemon rind. Cool until mixture mounds slightly. Add salt to egg whites; beat until foamy. Gradually beat in 3 tablespoons sugar. Continue beating until stiff peaks form. Beat gelatine mixture with rotary beater until smooth. Fold in beaten egg whites and whipped cream. Then, gently fold in strawberries and blueberries. Mound in prepared cupcake cups. Refrigerate until set. Makes 12 servings.

cream. Stir in coconut, nutmeats and cereal. Spread topping over warm cake. Place about 3 inches from hot broiler unit until mixture browns, about 2 minutes. Makes enough to top one 13x9-inch cake or two 8-inch or 9-inch square or round layers.

* * * *

ORANGE MACAROON CREME

12 coconut macaroons
6 oranges, peeled, cut into bite-size pieces
2 cups sliced fresh strawberries (or frozen and thawed)
½ cup light brown sugar
2 cups dairy sour cream

Crumble 6 coconut macaroons in bottom of an attractive glass serving bowl. Add half the orange pieces and sliced strawberries. Cover with half the brown sugar and sour cream. Crumble remaining macaroons over all and add remaining oranges, strawberries and brown sugar. Spread the remaining sour cream in a smooth layer over the top. Chill at least two hours or until very cold. 6 to 8 servings.

Hospital Insurance

Only 45 percent of the people living on farms have hospital insurance, according to the U S. Department of Agriculture. About 72 percent of the people in urban areas have this protection.

● American Farmer
(Continued from Page 1)

versified farm with an additional 8 acres of rented land.

The main farm program is swine and the herd consists of 44 sows, 25 gilts, 3 boars, and about 250 fattening pigs. The only other livestock on the farm is about 25 head of steers which are fattened twice a year. Most of the farm, about 44 acres, is in corn, but the Eby's also raise 2 acres of celery and 6 acres of vegetables.

Although John has never held a state FFA office, he has served as secretary of the county chapter, and as president and chaplain of his local chapter.

John has also been active in 4-H work, first with baby beef and then branching into his main farming interest, hogs.

MELVIN BRENEMAN

Melvin is a 1962 graduate of Lampeter - Strasburg High School, and is the 20-year-old son of Mr. and Mrs. C. Henry Breneman. He presently operates the 130-acre home farm in partnership with his father and with his younger brother, Larry, who is a senior at Lampeter-Strasburg.

The main farm enterprise is dairy and the only crops grown on the farm are feed for the 75-head of milking Guernseys and 30 head of young stock The family farms 50 acres of corn and 50 acres of alfalfa, with most of the latter going into the silo in the form of haylage.

Melvin served as chaplain in the state FFA association in 1963-64, and has held the offices of sentinel and chaplain in the local Garden Spot Chapter. He received the highest state FFA award in 1962, the Keystone Degree. He also has a history of 4-H activity. He is a past president of the county Guernsey club, and now serves that club as a junior leader.

His plans for the future are closely tied to farming, but he also hopes that at the right time he may be able to further his formal education.

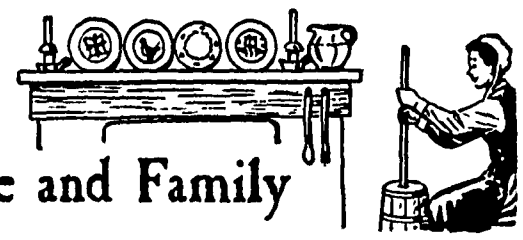
Area Guernseys Make Records

Registered cows in herds of two area Guernsey breeders recently completed official production records according to the American Guernsey Cattle Club.

Two of these were in the herd of J. Rohrer Witmer, Willow Street: Lee Kra Farms S Emily, a Jr. 7-year-old, produced 11,910 lbs. of milk and 624 of butterfat; Ludlow Beautys Golda, a Jr. 8-year-old, had 11,710 lbs of milk and 577 of butterfat.

A Jr. 3-year-old, Meetinghouse Lane Fame Felice, owned by H H. McConnell of Honey Brook, produced 11,580 lbs milk and 537 of butterfat.

All records were under the DHIR testing program, and were for a period of 305 days.



For the Farm Wife and Family

Ladies, Have You Heard? . . .

Some Hints for Easy Sandwich Preparation

THOMAS

When preparing sandwiches for three or more persons at one time, these tips can help make the job go faster.

Soften butter or margarine.

Place neighboring slices of bread in an even number of rows on a bread board or table top.

Use a flexible spatula for spreading a coating of softened butter or margarine to the edges of each slice of bread.

Put filling on half the slices and then top with neighboring slices.

Stack two or three sandwiches, and cut them all at once with a large sharp knife. Vary the shapes of sandwiches occasionally.

Wrap each sandwich separately, then label each kind for sure and easy packing.

Worth Knowing Anytime

Whatever happens to any United States Savings Bonds you own, your savings remain intact . . . safe and secure. Your government stands behind every Savings Bond you buy with a guarantee of free replacement if lost, stolen, or destroyed Safe investment That's the main reason why millions of Americans buy U S Savings Bonds And many of these millions do it regularly . . every month through the payroll savings plan where they work.

Clean safety belts give more protection, according to safety engineers who have studied the growing use of safety belts as a means to reduce injury in auto accidents. Men and women are apt to neglect fastening soiled seat belts lest they soil clean suits or dresses. Fortunately, safety belts are made of sturdy webbing and can be removed for washing by machine. Or they can be scrubbed in hot soap or detergent suds, using a stiff brush to remove embedded dust and soil.

4-H Dairy Show

(Continued from Page 6)

HOLSTEIN

For the showmen of the "Black and White" breed the only bright spot came in the intermediate calf class when Lorae Harbold, Elizabethtown R1, showing Gryholm Skyliner Crissy and Carol Jean Kettering, Lititz R3, with Henket Honey Marge, placed one-two respectively at the head of a long line of good quality calves.

Other Holstein placings were:

Junior calf:
11 Rhoda Stauffer, Ephrata R1
12 Donald Bare

Senior calf:
5 James Kettering, Lititz R3
7 Judy Ann Rodgers, Marietta R1

Junior Yearling:
3 Edwin Hess, Strasburg R1
5 Jeffrey Peifer, 1831 Hans Herr Drive, Lancaster

Senior Yearling:
9 Jacob L Stoltzfus, Narvon R2

Three-year-old:
10 Donald L. Bollinger, Manheim R1

AYRSHIRE

The judge for the Guernsey, Brown Swiss, Ayrshire, and Milking Shorthorn breeds was Lee Yost, Wyno Farm, Muncy, Pa. In the Ayrshire breed, Yost placed the local entries as follows:

Senior Calf:
5 Nancy Flory, Lititz R2

Junior Yearling:
2 John Clark, Lititz R1
3 Mary Jane Eshleman, Elizabethtown R1

Two-year-old:
5 Carol Ann Brubaker, Lititz R1

Three-year-old:
5 James Esbenshade, Quarryville R1

The Lancaster County Ayrshire group was placed fourth.

All blue ribbon winners are qualified to participate in the Pennsylvania State Junior Dairy Show to be held September 13 at the Farm Show Building, Harrisburg.

MASTER FITTING AWARDS

Jersey Breed:

Nancy Kreider, Drumore R1 and Thomas Aaron, Quarryville R1.

Holstein Breed:

Rhoda F Stauffer, Ephrata R1; Carol Jean Kettering, Lititz R3; James E Kettering, Lititz R3; and Donald L. Bollinger, Manheim R1.

Guernsey Breed:

Cynthia Jean Balmer, Lititz R1; J. Nelson Landis, 1804 Hempstead Road, Lancaster; and Nancy J. Stoltzfus, Ronks.

MASTER SHOWMANSHIP TITLES

Jersey Breed:

Nancy Kreider, Drumore R1; Stephen Arrowsmith, Peach Bottom R1; Thomas Aaron, Quarryville R1.

Holstein Breed:

Glenn M. Kreider, Quarryville R1, and Donald L. Bollinger Manheim R1

Guernsey Breed:

E. Eugene Denlinger, Gordonville R1; James R Adams, Landisville, and Nancy J. Stoltzfus, Ronks R1.

Aryshire Breed:

Mary Jane Eshleman, Elizabethtown.

Judges for fitting and showing were Richard Little, Montour county agent, and Richard Plotts, associate Wayne county agent.

Mr. and Mrs. Joseph Martin's all-electric home at R. D. #1, Kinzers.

The Martin family paid an average of

ONLY $18.41* a month

for Total Electric Living including Electric Home Heating, Water Heating, Cooking, Lighting, and all their other electric services

That's why we say, to make an honest comparison of costs of various types of heating you must add together *all* costs. When you add together the costs of flame-type heating and electric service for other needs, chances are you'll find Total Electric Living—one service, one bill, no maintenance or service contracts—is your truly economical buy. Before you build or remodel, see your Reddy Kilowatt Recommended Electric Home Heating Dealer for an electric heating estimate, which he'll back up with a guarantee!

*If PP&L's new low rates had been in effect throughout the entire heating season, the average monthly cost would have been even lower.

USDA Prepares World Poultry Congress Plans

The U. S. Department has begun preparations for the upcoming World Poultry Congress to be held in the Soviet Union, August 15-21, 1966. The first step has been the organization of a Department committee, which will be headed geneticist Steven C. King of the Agricultural Research Service.

Other committee members named were: Hermon I. Miller, Consumer and Marketing Service; Edward Karpoff, Agricultural Stabilization and Conservation Service; Edward C. Miller, Cooperative State Research Service; George B. Rogers, Economic Research Service; Norman G. Paulhus, Foreign Agricultural Service; John J. Scanlan, Farmer Cooperative Service; Woodrow R. Jenkins, Federal Extension Service; and J. H. McCormick, Office of Information.

The World's Poultry Congress is held every four years by the World's Poultry Science Association, which is organized for the international exchange of scientific and technical knowledge regarding poultry production and marketing. Representatives of USDA, land grant institutions, and the U. S. poultry industry will participate U. S. scientists will present papers on poultry genetics and breeding, nutrition and physiology, disease control, economics and marketing, and related subjects.

U S members of the council of the World's Poultry Science Association have set up a Committee under the chairmanship of Dr. Cliff D. Carpenter, to plan for United States participation The USDA committee will cooperate with that Committee in the complex arrangements necessary to participation in the Congress.

● Artificial Breeding

(Continued from Page 1)

however, led the other states in number of cows artificially bred—14 million.

Numbers of dairy cows bred artificially—now 41 4 percent—have increased steadily in the United States over the years. In 1964 the total was 7 3 million, in 1954. it was 5 1 million and in 1939 (near the beginning of artificial breeding) only about 7,000

More than one million dairy cows, 15 3 percent of all those bred artificially, were mated to beef bulls in 1964. This reflects an interest by many farmers in "dairy beef."

The newly released figures show the increasing potential of artificial breeding in spreading the genetic contribution of superior sires over a large number of herds. More than 3,000 cows were bred per sire in 1964, compared with less than 2 000 in 1954, and 228 in 1939 A bull mated naturally breeds about 15 to 20 cows per year

Do you know how much milk your cows can really give?

Did you ever hear of a poultryman who gathered his eggs and then decided how much feed to give his hens? Or of a hog man who weighed his pigs and then decided how much feed they ought to get next day?

But how many dairymen do you know who weigh Bossy's milk, then decide how much feed to give her?

Doesn't make sense, does it?

Wayne's New Concept Dairy Feeding Program does! It leads Bossy into high production with high grain feeding FIRST. Then you adjust to the most profitable level, after you've learned how much milk Bossy can really give.

More dairymen every day are discovering the advantages of Wayne's New Concept Dairy Feeding Program, how Wayne's high-quality, multi-sourced ingredients pay off in the milk pail.

It works for them —it can work for YOU. Come in and talk it over.

four self-propelled harvesting implements all using the same rugged Power Unit!

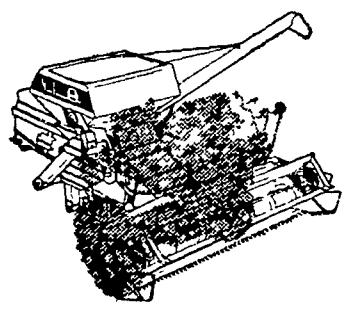
New Idea's **Uni-System** is the modern concept of harvesting machinery—combinations of interchangeable processing units, all carried, powered, and propelled by a single Power Unit. Just one investment in engine, transmission, wheels and tires—converting quickly from one harvesting unit to another, depending upon the crop. Here's how it works.

where bold new ideas pay off for profit-minded farmers

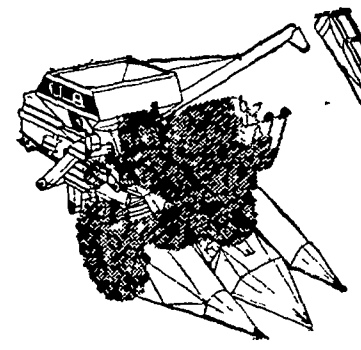
Start with the Power Unit. *Choice of 206 cu. in. or new 244 cu. in. engines—both featuring hydraulically controlled variable ground speeds (3 forward, 1 reverse), control tower visibility, and "easy on – easy off"* ***Uni-System*** *interchangeability. Then, select the* ***Uni-System*** *harvesting units you need. For small grain and beans, you have the Combine—with either an 11-foot or 13-foot grain platform. For shelled corn, you add a Cornhead.*

Just one Cornhead (with all the big capacity features of New Idea's famous Superpicker) to serve as the gathering unit for the ***Uni-Picker, Uni-Sheller or Uni-Combine.***

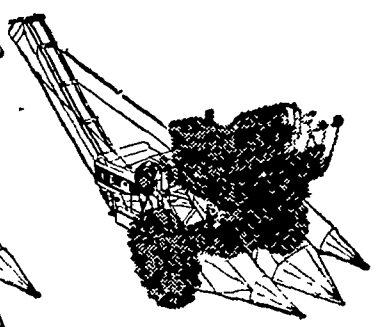
It's that simple. Only one investment in a Power Unit—then, your choice of interchangeable processing units to assemble up to four different self-propelled harvesting machines!



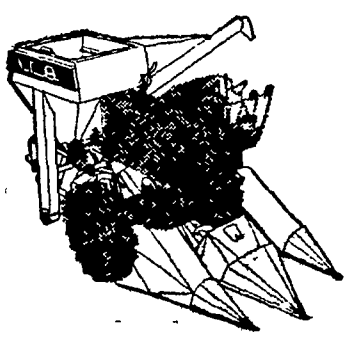
Uni-System combine **with big capacity from grain platform to 55-bushel grain bin. Features extra-heavy concave and the strongest cylinder in the business! Does superior job in small grain and beans in all field conditions.**



Uni-System combine with cornhead **for top performance in "corn country." Greedy Superpicker Cornhead has specially designed snapping rolls, and double auger elevators to carry the ears off fast.**



Uni System picker **has giant 12-roll husking bed, biggest on the market. Special presser wheels with 312 moving rubber Flexi-Fingers align the ears and keep them moving along the husking rolls. You get cleaner corn.**



Uni-System sheller, **world's only self-propelled sheller; cage-type, it lets you control the length of time the ears stay in the shelling cage. Delivers cleaner corn, fewer cracked kernels to 60-bu. bin.**

***New Idea 2333 FINANCE PLAN—Even if you buy the Power Unit and all available Uni-System harvesting units, your down payment is only $2,333 cash or trade. AND, after you've made one seasonal payment, you can buy additional Uni-System machines with no down payment!**

tember 23 will be FFA Judging Day at the Lampeter Fair. Ayers reported that with the increased fair fund set up by the state went some restrictions on judges and chairman; no one affiliated with either may show livestock in the same fair.

The bulk of the afternoon's discussion centered around the County Star Farmer question. That relatively new program involved a question that had not heretofore been considered: if the named star farmer should have some conflict over accepting the prize of $175 for a trip to the national FFA convention at Kansas City, should that money go to him anyway for other purposes, or should it go to the runner-up, or should it not be used at all? Discussion on this question consumed at least one hour, and proposals, counter-proposals, motions, and votes on motions showed opinion to be widely divergent. No provision had been made for this occasion when the original program was outlined, but the question of such a conflict has arisen this year. The issue was finally settled, if not resolved, by a vote of 7 to 5 in favor of having the money remain unclaimed this year if the chosen candidate were unable to make the trip.

In other business discussed, Garland Gingrich of Penn Manor High School reported the Lancaster County Soil and Water Conservation District had purchased a set of 90 slides for use by the Extension Service and themselves. These slides are also available to the vo-ag teachers as a teaching aid. He showed the group a sample of about 30 slides and illustrated their use.

Gingrich, as secretary for the conservation district, relayed a request that the teachers donate the soil profile they had constructed on June 17 to the conservation district so the latter could pass it on as an award at its annual banquet next March. The teachers voted unanimously to do so.

Thomas Mahlon, area supervisor, reported that Harrisburg is now accepting requests for vocational educational equipment under Public Law 88-210, which makes federal money available for such purposes. He also told the teachers of the law recently enacted which makes it mandatory for protective equipment to be worn at all times in their shop classes by teachers, students, and visitors where abrasive dusts or noxious vapors are involved.

Mahlon also told the group that there were 17 blue ribbon winners from the area at the district FFA dairy show (12 of these were from Lancaster County). These winners will be eligible to participate in the Junior Dairy Show at Harrisburg on September 13th.

He also circulated a list showing the number of FFA members by states for this year Pennsylvania had 9,511 paid-up members Leading the list was Texas with 50,600.

Cut field travel in half—Go 2-row

John Deere No. 6 PTO Forage Harvester

Row crops get chopped down in a hurry when you handle 'em with a low-cost John Deere No. 6 PTO Forage Harvester with a 2-row unit. You'll reduce the number of trips over the field and turns at row ends by 50 per cent. There's less field packing, too, when you go 2-row.

The No. 6 is also available with a heavy-duty or low-cost 1-row unit . . . 4-, 5-, or 6-foot mower bar . . . and a windrow-pickup unit.

See us soon for full details on the No. 6 Forage Harvester.

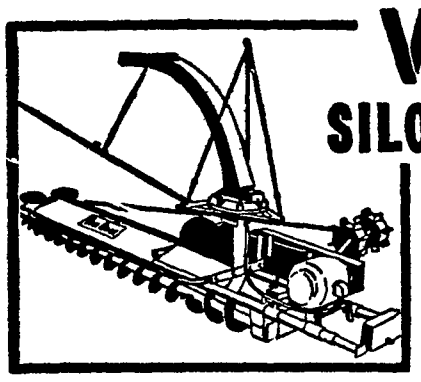
Complete automatic feeding for DAIRY COWS and CATTLE!

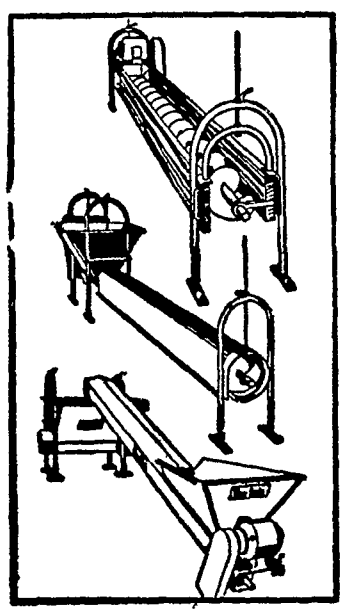
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment

Area Holstein Cows Complete SNF Records

The Holstein-Friesian Association of America recently reported that cows in five county herds had completed lactations under the association's total nutrient testing program. Their performance records include solids-not-fats (SNF) information.

The animals and their actual production levels are:

Roaring Maples Dandy Comet, a six-year-old, registered Holstein, has credits of 17,286 lbs. milk, 705 lbs. butterfat, and 1,480 lbs. solids-not-fat in 305 days. Roaring Maples Hillmac Echo, an eight-year-old, has produced 14,299 lbs. milk, 677 lbs butterfat, and 1,227 lbs. solids-not-fat in 310 days Roaring Maples Harmony Betts, a six-year-old, has produced 18,324 lbs milk, 742 lbs. butterfat, and 1 593 lbs solids-not-fat in 365 days Roaring Maples Ty Vic Echo, a five-year-old, has produced 14,760 lbs. milk, 617 lbs butterfat, and 1,250 lbs. solids-not-fat in 302 days. All are owned by Roy H. & Ruth H. Book, Ronks.

Nancy Leader Knollwood, a four-year-old registered Holstein, has credits of 19,067 lbs. milk, 851 lbs. butterfat, and 1,690 lbs. solids-not-fat in 344 days. Red Rose Pabst Prilly Almeda, a nine-year-old, has produced 24,021 lbs. milk, 848 butterfat, and 1,928 lbs. solids-not-fat in 346 days. Inka Star Betty, a four-year-old, has produced 21,340 lbs. milk, 824 lbs butterfat, and 1,795 lbs. solids-not-fat in 353 days. Red Rose Leader Arbelle, a three-year-old, has produced 20,981 lbs. milk, 796 lbs butterfat, and 1,804 lbs solids-not-fat in 365 days. All are owned by Red Rose Research Center, John W. Eshelman & Sons, Lancaster.

Lois Ormsby Ivanhoe, a three-year-old, registered Holstein, has credits of 19,518 lbs. milk, 789 lbs. butterfat, and 1,717 lbs. solids-not-fat in 365 days. Hershvale Ty Vic Gloria, a five-year-old has produced 20,004 lbs. milk, 722 lbs. butterfat, and 1,686 lbs. solids-not-fat in 346 days. Both are owned by Donald L. Hershey, Manheim.

Vanellen Clara Sensation, a five-year-old registered Holstein cow, owned by Titus M. Hurst, Lititz, has produced 15,193 lbs. milk, 636 lbs. butterfat, and 1,363 lbs. solids-not-fat in 303 days.

Penn Springs Regal Lucy, a five-year-old registered Holstein, has credits of 20,663 lbs. milk, 748 lbs. butterfat, and 1,704 lbs. solids-not-fat in 330 days. Penn Springs Master Trinket, a two-year-old, has produced 16,262 lbs. milk, 681 lbs. butterfat, and 1,398 lbs. solids-not-fat in 343 days. Inverlea Rubel Burke, a nine-year-old, has produced 15,597 lbs. milk, 633 lbs. butterfat, and 1,286 lbs. solids-not-fat in 365 days. Penn Springs Ends Renie, a three-year-old, has produced 15,724 lbs. milk, 668 lbs. butterfat, and 1,349 lbs. solids-not-fat in 365 days. Penn Springs Captain Nickel, a two-year-old, has produced 15,225 lbs. milk, 609 lbs. butterfat, and 1,302 lbs. solids-not-fat in 365 days. All are owned by Robert H. Kauffman, Elizabethtown.

When she freshens...

WILL SHE BE A TOP PRODUCER?

Management-for-profit the PIONEER way starts with feeding the dry cow. PIONEER feeding programs give to the dry cow the nutrients she needs to maintain body reserves, produce a vigorous, healthy calf, and freshen strong, ready to go into top production and maintain the pace right through lactation. The feed with the lowest price tag is not always a bargain. PIONEER feeds cost less because they produce more — earn greater profits. A dry cow, fed only 600 lbs. of PIONEER, may return as much as 2,000 lbs. more milk as a result, and 2,000 lbs. of milk at $4/cwt. means a return of $80 in extra milk production, a bonus profit.
There's profit in PIONEER. Stop in soon and talk over your operation with us. Remember, there's a PIONEER feed to fit your need.

Crouse Regains Dist. Hay Title

by Everett Newswanger
Staff Reporter

HERSHEY — The later cut alfalfa took the show here last Friday at the tenth annual Southeastern Pennsylvania District Hay Show held as a feature of the Pennsylvania Forage Progress Days

Galen Crouse, Stevens R1, won the grand championship with his winning heat cured sample He also had first place class wins with four other entries: summer annual grasses with no heat; heat cured first cutting alfalfa heat cured later cut grass, and heat cured summer annuals

A York countian E Wayne Beshore New Cumberland, showed the reserve grand champion entry with a winner in the no heat division

There were 40 Lancaster County hay samples in the 164 entry show from the 17 Southeastern counties County placings follow

NO-HEAT DIVISION

Alfalfa grass mix first cutting:
5 Queameade Farm, Narvon R2

Alfalfa grass mix later cutting:
3 John Yost, Kinzers R1
4 Queameade Farm, Narvon R2

Grass second cutting:
4 Lynn H Royer, 2025 Oregon Pike, Lancaster
5 Robert B Risser, Lititz R1

Summer annual grasses:
1 Galen Crouse, Stevens R1
4 Clarence Dauple, Manheim R1
5 Irwin Z Seible, Mt Joy R2

HEAT CURED DIVISION

Alfalfa first cutting:
1 Galen Crouse, Stevens R1
4 Gerald Hess Leola R1

Alfalfa later cutting:
1 Galen Crouse, Stevens R1

Grass later cutting:
1 Galen Crouse, Stevens R1

Summer Annuals:
1 Galen Crouse, Stevens R1

Fall Rest Will Benefit Pastures

Permanent pastures are benefited by a rest period in the fall, says William Murphy, University of Missouri extension field crops specialist

He points out that while grass is making fall growth, it is also building up root reserves that strengthen plants for next years production

Fall growth that is not grazed while it is growing is not lost. The fall growth retains its quality, and can be used in late fall or early winter without depleting root reserves of the grass plants. This results in a saving on other feed during that period

Farmers who can manage to use other pasture, such as meadow aftermath and small grain pasture, and give their fall pastures a chance to take a 'fall rest" should come out ahead, says Murphy

Heisey Tops FFA Land Judging

Future Farmers of Lancaster County walked off with all four top spots in the FFA division of the land judging contest held in conjunction with Forage Progress Days at Hershey last week

The sweep was led by 18 year old David Heisey of the Conestoga FFA Chapter, followed in close order by Richard Smith New Providence R1, Tom Zartman Ephrata R1, and Cliff Bollinger, Lititz R4.
